

COMPANY INTRODUCTION

Coral Classics by A&P is a Florida based company specializing in the importing and distribution of Coral Stones, Shell Stones, and Limestones from around the world.

With over 45 years of experience in the stone importing business, we have built a very strong, very large network of manufacturers and distributors in all sectors of the stone industry. This gives us access to a large selection of marble and stone products and the distribution channels necessary to reach national level accounts.

With over a million SF in stock, in tiles, pavers, coping, & slabs, interior and exterior finishes, and our experience in custom architectural materials, Coral Classics is your go to source for all coral stone and shell stone materials for residential and or commercial applications.

As the innovators of marketing and selling Coral Stone in the USA, our knowledge and supply for Coral Stone and Shell Stone specifically is unsurpassable. Our quality, selection & service, is the best in the industry. Coral Classics has supplied materials for many commercial projects both in and outside the USA, such as **Dolce & Gabanna, Harry Winston Jewelers, Ralph Lauren, Apple Stores**, Private Island Estates and large commercial projects. Combined with the countless high end residential projects we have worked on, this gives Coral Classics the experience needed to continue building long term relationships with all of our clients.

Orders can be shipped anywhere in the world within 48 hrs of the order being placed. Samples of any material we stock are readily available in 4x4, 6x6, & 12x12 sizes for same day shipping via UPS, FedEx or any carrier of your choice. Loose full size samples can be arranged at any time and custom display units are available for any and all re-sellers. For local delivery, we have partnered with Kurierr, a local design dedicated delivery service that offers same day delivery in Dade, Broward and Palm Beach County.

We look forward to working with you.

ATLANTIC SHELL STONE

Atlantic Shell Stone by Coral Classics

Atlantic Shell Stone is a true shell stone. Each piece is swirled with shells throughout, and it is even in tone and shade. Being a true shell stone, Atlantic Shell Stone is naturally cool to the touch regardless of the heat exposure it is exposed to.

▶ For mud set over concrete slab as well as pavers for standard residential sand set applications.

ARCHITECTURAL PRODUCTS

Atlantic Shell Stone can be fabricated into just about anything from balusters and handrails to fireplaces, columns, moldings, door and window surrounds, bases, tables, cut to size and more....

SEALING

Atlantic Shell Stone is a porous stone that should be sealed with a high quality penetrating stone or marble sealer to close its pores and keep it from staining or attracting mold or mildew and allow it to be easily maintained. We recommend "Stain Proof by Dry Treat" sealer, for all interior and exterior applications. (refer to sealer page)

AUTHENTIC FLORIDA KEYSTONE

Authentic Florida Keystone by Coral Classics

Cut from areas that are under construction in the Florida Keys, it is swirled with large amounts of brain and fan corals. It is a very white material and is consistent in color from piece to piece, having many large and small holes throughout. Hues of Red and Brown colors are sometimes seen in this material as well as tree roots.

Authentic Florida keystone is a very rustic looking material and can be cut into tiles, pavers, copings, treads, architectural items, and small slabs. Material is available in 1" and 2" thickness depending on size, irregular flagging, and rough-face finish. Being a true coral stone, it retains no heat regardless of the sun's exposure it endures and is always cool to the touch and naturally non slip.

For mud set over concrete slab as well as pavers for standard residential sand set applications.

- 1" & 2" Keystone Pattern
- 1" & 2" Flagging
- Roughface / Splitface

- The most common application is to install this material in a natural saw cut unfilled finish, and then let the material "Patina" from being exposed to the weather.
- As a result of this process, the material will go through stages of green and black and eventually stain itself black in the holes and achieve the "Castle Look" making it appear to be thousands of years old.

ARCHITECTURAL PRODUCTS

Authentic Florida Keystone can be fabricated into fireplaces, columns, door surrounds, and other custom architectural designs.

SEALING

Due to the porosity of Authentic Florida Keystone, the material is difficult to be sealed and keep clean when used in a exterior application. Over time, the stone will "Patina", go through color changes from being exposed to natural elements, eventually develop the "old world castle" look, as seen all over South Florida, South Beach, Fisher Island.

BALI GREEN

Bali Green by Coral Classics

Bali Green is suitable for all types of underwater applications such as swimming pools walls and floors, waterline, water features and ponds. It is suitable for both saltwater and standard chlorine pool systems.

▶ Quarried and produced in Indonesia, this material is cut and produced by hand by local artisans

SIZES & FINISHES

4"x4"x3/8"

Rustic & Honed Finish

6"x6"x3/8"

Rustic & Honed Finish

▶ A very popular product all over Europe, Hawaii, Phuket and the Maldives to name a few, it is now making its way to the USA. Bali Green is sought after for its unique color changing characteristics and ability to not breakdown over time due to water submersion.

BALI GREEN SEALING

▶ Coral Classics by A&P recommends Dry Treat, Stain Proof or 40 SK, if sealing is required or wanted. (Refer to sealer page)

CALYPSO CORAL

Calypso Coral by Coral Classics

Calypso Coral is light beige in color with hints of white, yellow and brown tones mixed in with random brain and fan fossilization. Being a true coral stone, Calypso Coral Stone is always cool to the touch regardless of the sun exposure it endures.

In Saw Cut Unfilled, Calypso Coral is naturally Non-Slip. For this reason, it is an ideal product to use on any type of exterior application, sand set or mud set, and has become a favorite for use on pool decks, entry ways, patios and more.

CARIBBEAN SHELLSTONE

BY SPECIAL ORDER ONLY

Caribbean Shellstone by Coral Classics

Caribbean Shell Stone: This unique material is swirled with large and small "clam like shells" in every piece, that range in the shades of greys and whites. It is a very dense material, making it suitable for interior and exterior applications. When it is fabricated and cut into tiles, pavers, copings and slabs, there are few to any holes in it.

This makes the material ideal, after it is sealed properly, to not attract mold or mildew. Shaded with white & grey shells and a light beige back-round, this is truly a unique material. Being a true shell stone, this material is cool to the touch regardless of the sun exposure it endures.

Caribbean Shell Stone is currently available by Special Order only, in a variety of finishes, Honed, Honed & Filled, Brushed, Sandblasted or Bush Hammered. A beautiful timeless material in any application it is used in.

CLASSIC PREMIUM KEYSTONE

Classic Premium Keystone by Coral Classics

Classic Premium Keystone is loaded with brain and fan coral fossilizations that are hundreds of thousands of years old.

It is very white and consistent in color from piece to piece and shade and tone. There are holes throughout this stone which brings an old-world charm and castle like characteristics to every application it is used in.

Being a true coral stone, it does not retain heat regardless of the sun exposure it endures and in its natural saw cut unfilled finish, is non slip when wet. If left unsealed after installation in an exterior environment, this material will "patina" over time and achieve the "Old Florida Castle Look".

CORAL REEF WHITE

Coral Reef White by Coral Classics

Coral Reef White is a very dense material, making it an ideal choice for interior or exterior applications. Being a shell stone, it is cool to the touch regardless of the sun exposure it endures.

The density of this product and the few holes if any, allows it to stay clean and not attract mold or mildew in exterior applications once sealed properly. Each installation is unique to itself, and subtly brings the beauty and warmth of an off-white shade to the project.

► Suitable for residential and commercial applications, this has become a fan favorite for countless installations around the United States.

Sawcut / Unfilled

Seashell Coral is available in a max size of 24" x 48". Thickness can be 3/4" up to 10" thick. It can be ordered in many different finishes such as, Saw Cut Unfilled, Brushed Unfilled, Brushed & Filled, Honed & Filled, Sandblasted, Rough-Face, Split Face/Hand Chiseled and Bush Hammered to name a few

SEALER

Seashell Coral is a true Coral Seashell material. Once sealed properly with "Stain Proof" sealer, this material can be easily maintained in an exterior or interior installation.

SEASHORE WHITE

Seashore White by Coral Classics

Seashore White is a super dense material and wears well over the course of time, performs extremely well for interior or exterior flooring applications, if sealed properly after installation. The seashore white is commonly used for a modern clean white design. It gives a very rich appeal in any application. The stone brings beauty and elegance of clean white lines and creates an elegant look to any application it is used in.

Seashore White can be fabricated into many different things from fireplaces to columns, window and door surrounds, and more.

SLABS

Coral Classics by A&P
stocks slabs in 2cm, 3cm,
and 4cm in a Brushed
finish

If any other thickness or finish is wanted or requested for a specific project, material can be produced with proper lead time

SEALER

Seashore White is a porous stone that should be sealed with a high quality penetrating stone or marble sealer to close its pores and keep it from staining or attracting mold or mildew and allow it to be easily maintained. Coral Classics by A&P recommends Stain Proof by Dry Treat for all flooring, interior or exterior and 40SK by Dry Treat for cladding applications. (Refer to Sealer Page)

SHELLS REEF BEIGE

Shells Reef Beige by Coral Classics

This beautiful one of a kind shell stone is swirled with large and small abalone shells. It is uniform in color and is consistent from piece to piece. Every application is exclusive to itself and brings the beauty of million-year-old fossils into the modern-day home or business.

Shells Reef Beige is a very dense material, making it an ideal choice for interior or exterior applications. Being a true shell stone, it is cool to the touch regardless of the sun exposure it endures.

▶ Cut into tiles, pavers, copings & slabs it is available in a Honed & Filled or Brushed/Antiqued finish. The density of this product and the few if any holes in it, allows it to stay clean and not attract mold or mildew in exterior applications. This also makes the material very easy to maintain once installed and sealed.

SEALER

Coral Classics by A&P, recommends "Premium Impregnating Sealer by Dry Treat" for all flooring, interior or exterior and "40SK Consolidator & Water Repellent by Dry Treat" for cladding applications. (Refer to Sealer Page)

SUNSHINE / OOLITE

Sunshine / Oolite by Coral Classics

Sunshine Stone / Oolite is an Oolitic limestone quarried in South Florida. This unique material is extracted from underground shallow quarries that are thousands of years old. Created from water and compression, this material is uniform in color and is available in either a white selection or a gold selection. A very porous material with holes throughout, it has been used all over South Florida in all types of applications. Wall cladding, flooring, architectural elements, steppingstones, landscape boulders and retaining walls, wall caps, coping, stair treads, fountains, fireplaces and benches are just a few of the examples.

Made famous in Coral Gables and South Beach, it has been and is still today, used on luxurious residential homes and estates as well as commercial hotel and retail store applications.

▶ Sunshine / Oolite is only available in sawcut unfilled. Material is all cut to order. Special order, cut to size, small slab and solid block format.

SEALING

Sunshine / Oolite by Coral Classics

Sunshine/Oolite is a very porous stone that should be sealed with a high-quality penetrating stone or marble sealer to close its pores if you wish to keep it from staining or attracting mold or mildew. If stained, typically a simple bleach & water solution will remove it and bring the material back to its original color without damage. If Sunshine is not sealed, the material will collect mold & mildew in the pores & holes & turn black giving the material the "Old World Castle Look" that is often sought after by Designers & Architects. Coral Classics recommends 40SK Sealer for this product.
